16th European Conference on Software Maintenance and Reengineering (CSMR)

March 27-30, 2012

University of Szeged, Hungary

Organizing Committee

General Chair

Rudolf Ferenc

University of Szeged, Hungary

Program Chairs

Tom Mens

University of Mons, Belgium

Anthony Cleve

University of Namur, Belgium

Early Research Achievements Chairs

Gerardo Canfora

University of Sannio, Italy

Florian Deißeböck

Technische Universität München, Germany

Industrial Chairs

Jens Borchers

SCHUFA Holding AG, Germany

Hassan Charaf

Budapest University of Technology and Economics, Hungary

Tool Demonstrations Chairs

Holger Kienle

Mälardalen University, Sweden

Mircea Lungu

University of Bern, Switzerland

Doctoral Symposium Chair

Jurgen Vinju

CWI, The Netherlands

European Track Chair

Radu Marinescu

Universitatea "Politehnica" di Timisoara, Romania

Workshop Chair

Tamás Gergely

University of Szeged, Hungary

Tutorial Chair

Jens Knodel

Fraunhofer-IESE, Germany

Web & Publication Chairs

Csaba Nagy

University of Szeged, Hungary

Péter Hegedűs

University of Szeged, Hungary

Advisor

Elliot Chikofsky

Reengineering Forum, USA

Call for Submissions

CSMR is the premier European conference on the theory and practice of maintenance, reengineering and evolution of software systems. It promotes discussion and interaction among researchers and practitioners about the development of maintainable systems, and the evolution, migration and reengineering of the existing ones. CSMR 2012 will feature up to 10 technical research paper sessions, workshops, tutorials, an early research achievements track, an industry paper track, a tool demonstration track, a doctoral symposium and a special track on European research projects within the field of software maintenance and reengineering. The conference will be held in Szeged, the city of sunshine. CSMR is supported by the Reengineering Forum (REF). The proceedings of the papers will be published by the IEEE Computer Society Press. Details on the submission process can be found on the conference web site. Authors of selected papers will be invited to submit an extended version of their paper to a Special Issue of the Journal of Software Maintenance and Evolution: Research and Practice.

Important Dates

Technical Papers & Workshop Proposals

October 21, 2011 (Abstract)

October 28, 2011 (Full Paper)

Notification of Acceptance

December 2, 2011 (Technical Papers)

November 18, 2011 (Workshop Proposals)

January 13, 2012 (Satellite Events)

Satellite Events

(Early Research Achievements, Industrial Track, Tool Demonstrations, Doctoral Symposium, European Projects Track)

December 9, 2011 (Abstract)

December 16, 2011 (Full Paper)

Technical Research Papers (10 pages): Research papers should describe original and significant work in the research and practice of software maintenance and reengineering. Theoretical results, case studies, empirical research and experiments are particularly welcome.

Early Research Achievements Track Papers (6 pages): The ERA track papers should present great ideas and promising work in early stages of research. The submissions do not require full evaluation. The topics of interest are the same as the main research track. Participants will have the opportunity to present a summary of their work in form of a short paper and of a poster.

Industrial Track Papers (4 pages): The industry track papers should discuss industrial practice and experience reports describing problems (and their solutions) encountered in real applications.

Tool Demonstration Track Papers (4 pages): Tool demonstration track papers should include information on the theory, models, and infrastructure of the demonstrated tool. Challenges related to the use and adoption of the demonstrated tool should also be included.

Doctoral Symposium Papers (4 pages): The doctoral symposium track is for those who are currently working on or have recently completed their PhD thesis. The papers should describe a summary of their research.

European Projects Track Papers (4 pages): The European track papers should give an overview on ongoing or recently completed projects (both national and international) in Europe related to maintenance and/or reengineering.

Workshop Proposals (2 pages): Workshop proposals should include the names and affiliations of the organizers, a description of the topic, the intended audience, and the proposed format of the session. Once the proposal is accepted the organizers should submit a paper describing the nature of the workshop area, related work, and its anticipated impact.

All papers should adhere to the IEEE Submission Guidelines for Conference Proceedings and be submitted electronically in PDF format at the submission sites:
